Quick and Convenient Air Access to Coffs Harbour

QantasLink now operates only their latest 74 seat Bombardier Q400 aircraft to Coffs Harbour.

The newest edition of this popular aircraft is quieter, more streamlined and spacious. And with jet-like speed, the Q400 whisks passengers between Sydney and Coffs Harbour in just one hour.

Airport manager, Mr Dennis Martin, said "This is a significant investment by QantasLink and demonstrates their long-term commitment to regional Australia and in particular to Coffs Harbour".

With five Q400 flights per day between Coffs and Sydney, conference delegates have a wide choice of travel times. This provides convenient access for Sydney based delegates and especially for people travelling on connection flights from around Australia.

Another QantasLink service for travellers who are Qantas Club, Qantas Platinum and Gold Frequent Flyer members is the QantasLink Regional Lounge at Coffs Harbour. Members can enjoy relaxed and stylish comfort when next travelling for business or pleasure.

Virgin Blue also offers delegates additional services to Coffs Harbour with the recent expansion of their direct services from Melbourne.

Direct flights between Melbourne and Coffs Harbour are now available on Saturday and Sunday. Both are morning departures allowing delegates time to arrive and settle in before commencing their weekday meetings.

Twice daily services operate between Sydney and Coffs Harbour with connections from the Virgin Blue Australia-wide network.

Virgin flies to Coffs Harbour the Embraer 190 for 104 passengers and Boeing's 737-700 and 800 series catering for 144 and 180 passengers respectively.

This mix of aircraft allows Virgin Blue maximise both comfort and capacity for travellers journeying to and from Coffs Harbour.

Mr Martin said, " Conference planners considering Australian destinations for their next meeting now have an excellent choice of convenient air services with Virgin Blue, Qantas and QantasLink to and from Coffs Harbour".
